---

Data Engineer with intensive experience in a product-based organization with experience in building different tools to help the business grow.

---

## EXPERIENCE

### ASSOCIATE DATA ENGINEER

Shell India Market Pvt Limited, Bengaluru

2023-PRESENT

Working in a large corporation where data is of paramount importance. Worked in Shell under the mobility division which focuses primarily on European Markets with small presence in other global markets.

Extensively worked on ETL Pipelines using Azure Data Factory as an Infrastructure. Collaborated with various other dependent product teams for resolution of queries.

Wrote SQL Query and optimized it for Production by storing it in an SP.

Also used Azure Data Bricks to make an alert notification using a core logic from business that would send automated mails every-day for any faults in the data received in SQL Pools

---
